

## Baggage trolleys – Gepäckwagen GW

### Mobile promotion fleet

Baggage trolleys are the number 1 means of transport inside and outside the terminal. They are used everywhere – in the car parks, on the terminal forecourt, at the check-ins or in the passenger collection area. Almost every incoming or departing passenger uses one of the free trolleys. The integrated advertising motif of 50 x 40 cm is always in the user's view and the mobile advertising media even constantly attract the attention of people not using them. Depending on your budget, you can also book a block of baggage trolleys.
