

Suspended billboards – Deckenhänger DH

In excellent view

Departure terminal 1 is a constant hive of activity. The suspended billboards are always in excellent view here – at the highly frequented Air Berlin check-in and close to the international travel market. Two rows of 5 billboards each are available as attractive advertising spaces. The original design in typical airport look contributes to recognizability. The slim design of the suspension mounting and frame allows the actual advertising subject to develop its full impact.
